INVESTMENT OBJECTIVE & STRATEGY

The Fund intends to achieve for its participants long-term capital growth and dividend income generation by investing in equity securities with a track record of dividend payment.

CLIENT SUITABILITY

The Bank of Commerce Diversity Dividend Focused Fund is suitable only for investors who:

- Have an AGGRESSIVE risk profile
- With an investment horizon of more than five (5) years

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Credit Risk/Default Risk. The possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest payments/amortizations in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

Interest Rate Risk. The possibility that an investor may experience losses due to changes in interest rates.

Market / Price Risk. The possibility that an investor may experience losses due to changes in market prices of securities (e.g., bonds and equities).

Liquidity Risk: The possibility that an investor may experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss.

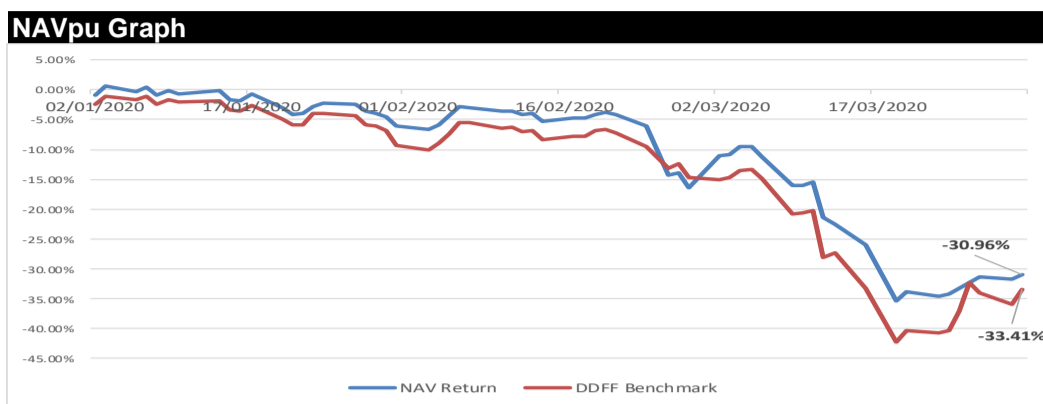

Reinvestment Risks. The possibility that an investor may experience losses due to probable lower returns or earnings when maturing funds or the interest earnings of the Fund are reinvested.

Country Risk. The possibility that an investor may experience losses arising from investments in securities issued by/in foreign countries due to the political, economic and social structures of such countries.

- **THE UIT FUND IS NOT A DEPOSIT AND NOT INSURED BY PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).**

The Fund has deposit with the Bank Proper amounting to Php 25,870.32 which is 0.15% of the fund. Bank of Commerce is an approved counterparty by the Trust and Investment Committee and the Board of Directors. All related party transactions are conducted on an arm's length basis.

OUTLOOK AND STRATEGY

Last March 19, the exchange reopened from a two-day shutdown in compliance with the Metro Manila lockdown meant to contain the spread of COVID-19, the index saw a record 24.3% nosedive before paring some of the losses and still recording its worst one-day drop (in pts and pps) by the close. On March 31, Philippine stocks bounced amid FTSE and quarter-end rebalancing activity, tracking the upturn on Wall Street on optimism over increased testing and a possible coronavirus vaccine. Despite foreign outflow extending to twelve straight sessions, further positive news of a rebound in Chinese manufacturing activity in March saw the PCOMP trade higher all session, finishing at 5,321.23 pts. Foreign investors sold a net Php634.52mn (USD112.45mn) on 62% participation.

On the technical aspect, the PCOMP year to date performance is around -31.61%. Supports are at 4,626.30 & 4,331.28 while the resistance levels are at 5,401.58 & 7,034.86.

The following are the fund's considerations and strategy:

1. After considering the effect and further impact of the COVID-19, the fund has done portfolio rebalancing which is a shift to 60% Common Shares and 40% Preferred Shares mix to manage the high volatility of the market.
2. The fund will adopt a well-diversified equity selection with preference to index issues with consistent historical dividend payments, strong fundamentals and with less impact to business brought by the COVID-19 pandemic.
3. Maintain exposures to high-yielding and highly tradeable issues for liquidity requirements.

Statistics

Wtd. Ave. Duration	N/A
Volatility*	11.22%
Sharpe Ratio**	1.56
Information Ratio***	1.33

*Volatility measures the degree to which the Fund fluctuates vis-a-vis its average return over a period of time.

**Sharpe ratio is used to characterize how well the return of the Fund compensates the investor for the level of risk taken.

***Information ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.
